

ABEL PRASAD

Philadelphia, PA | (215) 827-7756 | abelprasad4@gmail.com | linkedin.com/in/abel-prasad | github.com/abelprasad | abelprasad.github.io

EDUCATION

Pennsylvania State University, Abington | B.S. in Computer Science

Expected Dec 2026

Coursework: Data Structures and Algorithms, Operating Systems, Databases, Machine Learning, Artificial Intelligence, Computer Vision, Software Testing

TECHNICAL SKILLS

Languages: Java, Python, TypeScript, JavaScript, C#, SQL, HTML/CSS

Backend & APIs: Spring Boot, ASP.NET Core/MVC, FastAPI, Node.js, REST APIs, microservices, system design, JWT/RBAC, SQLAlchemy

Frontend: React, Next.js, Angular

Data & Systems: PostgreSQL, MongoDB, Redis, SQLite, Docker, Linux, IIS, YARP

Testing & Delivery: Git, GitHub Actions, Azure DevOps, Playwright, unit and end-to-end testing, Snyk, CycloneDX SBOM, Vercel, Cloudflare Tunnel

AI & LLM Engineering: AI Agents, LLM API integration (Groq, OpenAI), Ollama, multi-agent pipelines, RAG, vector databases, prompt engineering, AI-assisted development

EXPERIENCE

Ascensus

Jul 2026 - Present

Associate Software Engineer | Plan Sponsor, Team Aqua

Dresher, PA

- Led software bill of materials remediation across 20 production npm and .NET manifests; generated CycloneDX 1.4 BOMs and used Snyk to cut findings from 41 to 23 while eliminating all critical findings.
- Shipped dependency and CVE fixes across 12 React micro-frontends and legacy PDXWeb; validated clean installs, Nx builds, unit tests, and scoped scans across 11+ merged pull requests.
- Delivered production features across ASP.NET MVC/Core, React, database, and shared-library layers, including plan-type gating, feature-flagged permissions, SSO navigation, and an API-to-BFF contract fix validated by 166 tests.

DOGSRUN

Feb 2026 - Jun 2026

Software Engineer Intern

- Rebuilt a live shelter-to-rescue platform from Microsoft Power Platform on Next.js 16 and Supabase, supporting 150+ dogs, automated matching, bulk imports, and transactional email.
- Designed role-based authentication, isolated route trees, a rescue approval workflow, and admin tools; added row-level security, Redis rate limiting, input protections, and 45 Playwright end-to-end tests.

PROJECTS

SENTINEL | Java 21, Spring Boot 4, Angular 21, PostgreSQL

2026 - Present

- Built and deployed a self-hosted ADS-B data platform that ingests flight data, detects suspicious patterns, and generates Groq-powered natural-language incident summaries.
- Implemented JWT role-based access control and continuous deployment through GitHub Actions to a Linux server exposed through a Cloudflare Tunnel.

Scout | Python, FastAPI, Playwright, SQLite, Ollama

Dec 2025 - Present

- Built a self-hosted mission-agnostic AI agent framework (core/ + plugin missions) with multi-agent pipelines powered by local LLMs via Ollama.
- Shipped a job-discovery mission that scored 6,000+ listings, reducing manual review time by 80% through skill matching and negative filters, with ranked email and Telegram digests.

Mini-Pupper V2 Robotics Capstone | ROS 2, Python, MongoDB, Redis

Jan - May 2026

- Secured distributed robot-control microservices with mutual TLS and built a MongoDB telemetry pipeline with Redis state, cutting debugging time by approximately 50%.
- Integrated AprilTag detection with a ROS 2 control layer for autonomous, landmark-based maze navigation without GPS or manual waypoints.
